

ACCESSIBILITY

Initiative In 1998, Congress amended the Rehabilitation Act and strengthened provisions covering access to information in the Federal sector for people with disabilities. As amended, Section 508 of the Rehabilitation Act requires access to the Federal government's electronic and information technology. The law applies to all Federal agencies when they develop, procure, maintain, or use electronic and information technology.

Federal agencies must ensure that this technology is accessible to employees and the public. In compliance with Section 508, the Korea Region of the Installation Management Command (IMCOM) is dedicated to making all of our web pages accessible to all of our visitors. If you find a problem that prevents access, please contact us by sending an e-mail to the Web Manager.

Documents in .PDF or .PPT format

Free tools are available from the Adobe Corporation to assist visually impaired users at:
